Technical Skills

Java, React, AWS, Git, SQL, Spring Boot, REST API, Mockito, Maven, Junit

Education

Sinhgad College Of Engineering

July 2021

Bachelor of Engineering, Computer Science Engineering

GPA 8.59

Paper Publication: Safe - Oxi: A Remote Blood Oxygen Saturation and Temperature Monitoring and Analysis System of a Covid Patient Using IOT

Link: <https://bit.ly/3HJAQiz>

Certifications

- AWS Cloud Practitioner Certification
- Secure Coding Practices Certification By Udemy
- Microsoft Technical Associate in JavaScript
- NPTEL certification in C++ Programming

Projects

Remote Covid Monitoring Tool

Technology used: IoT, Embedded C, Machine Learning, JavaScript, HTML, CSS, Cloud Storage

- Architected a device capable of sharing real-time health metrics of a Covid patient across any distance.
- Made use of ThingSpeak IoT cloud to send and receive data from cloud
- Implemented ML Algorithms such as K-Means clustering for analyzing User's condition
- Built an Android App and a website for showing the resulting Dashboard.
- Published paper.
- Lead a team of 4 people and was responsible for design and development of the System.

Media Recorder Tool using React

Technology used: React, CSS3, HTML5, Redux

- Web Based Video Recorder tool created using React and related libraries
- Can record audio as well as video from any device's front camera.
- Can save video in MP4 and webm format.
- Project Link: <https://github.com/bedmuthaapoorv/Simple-Video-recorder-In-React>
